

ABSTRACT

A composition with transfer resistance and/or waterproof properties comprising at least one linear dimethicone; and at least one block copolymer film former chosen from tri-block copolymer film formers, multi-block copolymer film formers and radial block copolymer film formers. The invention also provides for a cosmetic powder delivery system and a method of delivering a powder composition to a keratinous substance.

Figure 1 consists of 12 histograms, labeled (a) through (l), each representing a different demographic or socio-economic variable. The histograms show the frequency distribution of responses for each variable. The variables are: (a) Age, (b) Sex, (c) Education, (d) Occupation, (e) Income, (f) Health, (g) Religion, (h) Ethnicity, (i) Marital status, (j) Family size, (k) Number of children, and (l) Number of siblings. Each histogram has a vertical axis representing frequency and a horizontal axis representing the categories of the variable.
